

## APPROACH TO SHOCK

**Dr. Abubaker El Haj**

Lugansk State Medical University (LSMU)

### Abstract

SHOCK:

- RESULTS FROM THE WIDESPREAD FAILURE OF THE CIRCULATORY SYSTEM TO OXYGENATE AND NOURISH THE BODY ADEQUATELY. (ROSEN)

SHOCK:

- IS CIRCULATORY INSUFFICIENCY THAT CREATES AN IMBALANCE BETWEEN TISSUE OXYGEN SUPPLY (DELIVERY) AND OXYGEN DEMAND (CONSUMPTION). (TINTINALLI)

MORTALITY:

- Septic shock has an estimated mortality of 40% to 60%.
- Cardiogenic shock has an estimated mortality of 36% to 56%.<sup>4</sup>
- Approximately 30% to 45% of patients with septic shock and 60% to 90% of patients with cardiogenic shock die within 1 month of presentation.

### Biography

The Abubaker El Haj is a senior research fellow at the Institute of Lugansk State Medical University (LSMU). He is the Emergency Medicine Resident Physician. The Abubaker El Haj is a senior
